

Setting the Standard in

# **PEDIATRIC GASTROENTEROLOGY & HEPATOLOGY**

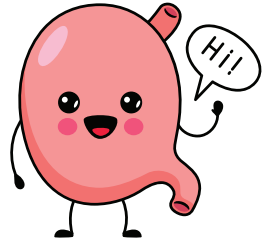

Unparalleled Care for Every Child

Our **Pediatric Gastroenterology & Hepatology** division is dedicated to diagnose and treat, digestive & liver conditions in children & teenagers.

Pediatric GI issues can present differently from those in adults, encompassing a range of unique conditions and symptoms.

Along with the care of uncommon & complex GI diseases we also provide robust support in managing common GI conditions, such as constipation & GERD as well.

We provide a full spectrum of diagnostic and endoscopic services, cutting-edge techniques and advanced facilities. Our collaborative team integrates expertise from various pediatric specialties, radiology, and pathology to ensure comprehensive care.

Patients from different parts of the world reach out to us for expert opinion and management

### **Extensive Experience**

#### **Over 6,500 Pediatric Patients Treated:**

Our department has successfully catered to over 6,500 pediatric patients in the past few years, demonstrating our extensive experience and trust within the community.

### **Advanced Technology:**

Our endoscopy unit offers the most advanced diagnostic & therapeutic procedures, including cutting-edge interventional endoscopic techniques which are exclusively done by our very experienced pediatric gastroenterologists.

### **Comprehensive Endoscopy Services:**

We offer endoscopy services for patients as small as 1 kg and as big as 18 years old, ensuring tailored care for all age groups.

### **Colonoscopy by Trained Specialists:**

Our trained specialists provide expert colonoscopy services, ensuring high standards of care.

### **Endoscopy Excellence (Zero Complication Rate):**

We pride ourselves a zero percent complication rate for endoscopy in our vast experience of more than 800 endoscopies and colonoscopies we have no major complications.

### **Expert Team**

Our team includes specialized pediatric anesthetists, ensuring safe and effective procedures for young patients.

Collaboration between pediatric intensivists and gastroenterologists ensures comprehensive management of acute and chronic conditions.

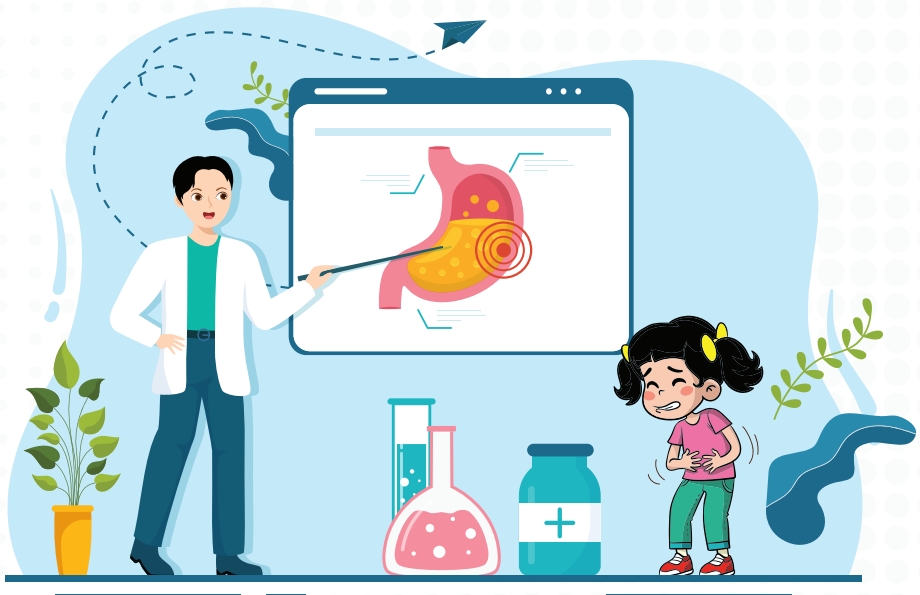

### **Specialized ICU Services**

Our state-of-the-art Level-3 Pediatric Intensive Care Unit (PICU) is equipped to handle severe cases requiring intensive care, such as acute pancreatitis, jaundice, acute liver failure, severe vomiting, and severe diarrhea.

We are also specialized in managing rare and congenital GI and liver diseases in new borns in our state of art NICUs.

Our team is adept at managing acute conditions in children requiring ICU care, ensuring timely and effective interventions
